

Cherie N. McKenna

Cherie McKenna is a native of Southern California. She attended Orange Coast College where she studied Business Administration. Prior to joining Novesis, she worked in the commercial real estate development industry for eleven years as the Operations Manager for a prominent Orange County real estate developer.

In 2006 she relocated to South Carolina and shifted her career focus towards environmental management. Since joining Novesis she has developed an extensive working knowledge of the Resource Conservation and Recovery Act (RCRA) hazardous waste management regulations, and the Comprehensive, Environmental Liability and Compensation Act (CERCLA) site assessment and remediation process. She is regarded by Novesis' clients to be a valuable resource on RCRA hazardous waste matters (particularly in the areas of contingency planning, waste determination and representative sampling) and is an experienced CERCLA assessment and remediation project manager with a strong working knowledge of federal and state regulatory programs and guidelines.

Ms. McKenna was promoted to Vice President of Novesis, Inc., in 2010. In addition to managing daily operations and client projects, she provides oversight for project scoping, proposal preparation and completion of workplans.

SUMMARY OF EXPERIENCE

Novesis, Inc. – Lexington, SC.

Vice President (2010 - Present)

Ms. McKenna manages a diverse portfolio of clients, working closely with their staff and Novesis' staff to create, implement and monitor project strategies, including scheduling and coordination of field activities necessary to successfully advance projects through applicable regulatory programs (CERCLA, RCRA and State Voluntary Cleanup Contracts (VCCs)).

Ms. McKenna acts as project manager for numerous contaminated site projects. She manages environmental sampling investigations requiring technical support, including subcontractor selection and scheduling, review of historic site documents, data evaluation, and client coordination. Ms. McKenna provides project oversight for field programs including environmental drilling, monitoring well installation, groundwater, soil, sediment and hydric soil sampling, and aquifer recharge evaluations. She prepares and contributes to technical reports related to site monitoring and progress, including, but not limited to: work plans, health and safety plans, environmental site investigations, groundwater quality evaluations, groundwater modeling, and site closure reports.

She has authored numerous Hazardous Waste Contingency Plans (fully compliant with the new Hazardous Waste Generator Improvement Regulations, and applicable permitted facility regulations), and has provided oversight on a number of comprehensive hazardous waste characterization projects.

Novesis, Inc. – Lexington, SC

Director of Operations (2008 - 2010)

In 2008 Ms. McKenna joined Novesis, Inc. as the Director of Operations assisting the President/CEO with operations, sales, marketing, and financial matters for the Lexington, South Carolina Office. Worked directly with President/CEO on special projects, regulatory research, company policies, procedures, and correspondence. Responsible for coordinating internal resources and third parties/vendors for successful execution of projects. Worked with staff to ensure that all projects were delivered on-time, within scope and within budget. Assisted with new project scoping, client interaction, project management and accounting.

AECOM – Columbia, SC.

Office Manager (2006 to 2008)

Served as a liaison for implementation of the corporate Environmental Health and Safety program at the local level. Worked with Regional Health and Safety and EHS managers to ensure regulatory compliance within operations office facilities. Served as office procurement facilitator to create, issue and perform final review of subcontractor purchase orders. Assisted project managers in

the preparation of technical reports, proposals and client presentations. Participation on medium to large sized projects, including having responsibility for client interface, subcontracting, project team assignments, resource scheduling, and project completion for all areas of expertise for the department. Maintained a system of continuing coordination, follow ups and monitoring of subcontractor operations.

Lake Development Group, Inc. – Newport Beach, CA.

Operations Manager (1994 to 2006)

As the Operations Manager for Lake Development, Inc., Ms. McKenna was responsible for managing new construction development projects. She worked directly with lenders to coordinate construction loan draw payment schedules, fund distribution, and proper cost allocation. She maintained project responsibility from pre-construction to closeout; client and subcontractor relations, team collaboration, project scheduling, budgets, change orders, and submissions. Assisted the President and CEO in negotiating and drafting letters of intent (LOI) for purchase with sellers. Additionally, Ms. McKenna independently developed an accounting system for the company to track all construction and project acquisition costs totaling over 18 million dollars per year.

EDUCATION

Orange Coast College (1990 to 1994)

Costa Mesa, CA

Business Administration
